

Dr. Rena Chengxiang YU

蔚 承 湘

University of Castilla-La Mancha

Department of Applied Mechanics
Civil Engineering School
Avda. Camilo José Cela
13071 Ciudad Real, Spain

Phone: (34) 926 295 300 Ext. 6313 Cell: 649 857 327
Email: rena@uclm.es
Homepage: <http://www.uclm.es/>

Education

Bachelor of Science in Aeronautics, Beijing University of Aeronautics and Astronautics, 1994.

Master of Science, California Institute of Technology (Caltech), USA, 1997.

Ph.D. in Computational Solid Mechanics, Caltech, USA, 2001. (Advisor: Michael Ortiz)

Positions

Graduate Research Assistant, Caltech 07/1997–06/2001.

Postdoc Scholar, Caltech 07/2001–11/2001.

Postdoc Scholar, University of Castilla-La Mancha (UCLM) 12/2001–05/2003.

Ramón y Cajal Scholar, UCLM, 06/2003–07/2007.

Associate Professor tenure track, UCLM, Spain 07/2007–11/2009.

Associate Professor, University of Castilla-La Mancha, Spain 12/2009–12/2019.

Coordinator for the Doctorate Program in Territory, Infrastructure and Environment, UCLM, 11/2015–present

Full Professor in Continuum Mechanics, UCLM, since December, 2019.

Academic Awards

Russell R. Vought Scholarship, Caltech, USA (10/1996–06/1997)

GALCIT Research Assistantship, Caltech, USA (07/1997–06/2001)

Ramén y Cajal Scholar, funded by the Spanish Ministry of Science and Technology (2003–2007)

José Castillejo Fellowship, funded by the Spanish Ministry of Education (05/2008–08/2008)

Doctoral students supervised (5)

1. Rocio Porras (09/11/2011), Flexocompression of slender panels made of low reinforcement concrete (with Jacinto Ruiz Carmona)
2. Luis Saucedo (26/10/2012), Meshfree methods applied to tensile fracture and compressive damage in quasi-brittle materials
3. Elisa Poveda (12/04/2013), Fatigue of concrete slabs for railway tracks (with Juan Carlos Lancha)
4. Fabiano Tavares (08/05/2013), Coupled model of initiation and propagation of corrosion in reinforced concrete (with Carmen Andrade)
5. Pedro Navas (03/11/2017), Meshfree methods applied to dynamic problems in construction materials and soils (with Susana López Querol, Bo Li)

Research interests

Computational mechanics of solids and structures (finite element methods and meshfree approaches), in particular, modelling of tensile fracture, compressive, or fatigue damage in quasi-brittle materials such as concrete, fibre reinforced concrete under different loading rates.

International Scientific Advisory Committee

FraMCoS-8 (8th International Conference on Fracture Mechanics of Concrete and Concrete Structures, Toledo, Spain, March 11-14, 2013)

ICCM 2014 (5th International Conference on Computational Methods, Cambridge, England, July 28-30, 2014)

ICCM 2016 (7th International Conference on Computational Methods, Berkeley, CA, USA, August 1-4, 2016)

ICCM 2017 (8th International Conference on Computational Methods, Guilin, China, July 25-29, 2017)

ICCM 2018 (9th International Conference on Computational Methods, Rome, Italy, Aug. 6-10, 2018)

DINEST 2018 (1^a Conferencia de Dinámica Estructural, Madrid, Spain June 20-21, 2018)

Executive member for fib WG2.4.2 (Modelling of fibre reinforced concrete structures, Convenor: Joaquin Barros) since 09/2016

National, Regional Projects and industry colaborations as principal researcher and participant researcher

1. Dynamics of composite materials
Financed by: ONR, USA
Duration: 01/1997-12/2001
Amount: 1 million US dollars
Principal Researcher: Michael Ortiz
2. Modelización y simulación de procesos complejos de fractura y deterioro en hormigón estructural
(Modelling of complex fracture and damage processes in structural concrete)
Financed by: Ministerio de Educación y Ciencia (Ramón y Cajal, 2003-20-10-542M-750)
Duration: 06/2003-07/2007
Amount: 161.3 kEuros
Principal Researcher: Chengxiang Yu
3. Fatiga de hormigón de altas prestaciones reforzado con fibras
(Fatigue in High Performance Concrete reinforced with fibres)
Financed by: Junta de Comunidades de Castilla-La Mancha, PEII11-0139-7194
Duration: May 2011-April 2014
Amount: 150 kEuros
Principal Researcher: Chengxiang Yu
4. Fatiga de hormigón de altas prestaciones: modelo probabilista y validación experimental
Fatigue of concrete: probabilistic modelling and experimental validation)
Financed by: Ministerio de Educación y Deportes, MAT2012-35416
Duration: Feb 2013-Jan 2016
Amount: 58.5 kEuros
Principal Researcher: Chengxiang Yu
5. Modelización y simulación de procesos complejos de fractura en materiales cohesivos y compuestos.
(Modelling of the complex fracture process in cohesive materials and composites)
Financed by: Dirección General de Universidades, SB2000-0191
Duration: Dec. 2001 - May 2003
Amount: 34.3 kEuros
Principal Researcher: Gonzalo Ruiz López
6. On-site investigation techniques for the structural evaluation of historical masonry buildings
Financed by: European Commission, Program on Energy, Environment and Sustainable Development, EVK4-2001-00091
Duration: Jan 2002 - Dec. 2005
Amount: 234 kEuros
Principal Researcher: Christiane Maierhofer (Federal Institute for Materials Research and Testing, BAM, Berlin, Germany)
7. Modelización y simulación de procesos complejos de fractura en hormigón armado.
(Modelling of the complex processes of fracture in reinforced concrete)
Financed by: Ministerio de Ciencia y Tecnología, MAT2003-00843
Duration: Jan 2004 - May 2007
Amount: 55 kEuros
Principal Researcher: Gonzalo Ruiz López

8. Estudio experimental y numérico sobre procesos de fractura en hormigón armado.
(Experimental and numerical study on the fracture of reinforced concrete)
Financed by: Ministerio de Fomento, BOE305/2003
Duration: Dec. 2003 - Dec. 2006
Amount: 93 kEuros
Principal Researcher: Gonzalo Ruiz López
9. Fisuración de hormigón en modo mixto en presencia de armaduras: estudio experimental y numérico.
(Mixed-mode fracture in concrete: experimental and numerical study)
Financed by: Junta de Comunidades de Castilla-La Mancha Consejería de Educación y Ciencia
Duration: June 2005 - Dec. 2007
Amount: 198.4 kEuros
Principal Researcher: Gonzalo Ruiz López
10. Modelado y simulación de procesos de fractura dinámica en hormigón armado
(Dynamic fracture in reinforced concrete)
Financed by: Ministerio de Educación y Ciencia, MAT2006-09105
Duration: Oct. 2006 - Sept. 2009
Amount: 134 kEuros
Principal Researcher: Gonzalo Ruiz López
11. Modelado y simulación de los procesos de fractura en hormigón inducidos por la corrosión de las armaduras
(Corrosion-induced fracture modelling in reinforced concrete)
Financed by: Ministerio de Fomento, C34/06 (Subproyecto 2)
Coordinate Institution: Instituto Eduardo Torroja
Principal Coordinator: M. Carmen Andrade Perdrix
Duration: Dec. 2006 - Dec. 2009
Amount: 67.3 kEuros (Subproyecto 2)
Principal Researcher: Gonzalo Ruiz López (Subproyecto 2)
12. Comportamiento del hormigón de alta resistencia en fractura bajo solicitudes de compresión: estudio experimental y numérico
(High-strength Concrete at low loading rates under compression: experimental and numerical study)
Financed by: Junta de Comunidades de Castilla-La Mancha, PAIo8-0196 Consejería de Educación y Ciencia
Duration: Jan 2008 - Dec. 2010
Amount: 72 kEuros
Principal Researcher: Gonzalo Ruiz López
13. Ayuda para la Adquisición de un Banco de Ensayos Dinámico de Alta Frecuencia para el Laboratorio de Materiales y Estructuras de la ETS de Ingenieros de Caminos, C. y P. de Ciudad Real
(Infrastructure funding for high frequency tests for the Material and Structure Laboratory in Ciudad Real)
Financed by: European Union (FEDER)
Duration: Jan 2008 - Dec. 2010
Amount: 55 kEuros
Principal Researcher: Gonzalo Ruiz López
14. Fractura de hormigón de alta resistencia en régimen de impacto
(Fracture of concrete under impact loading)
Financed by: Ministerio de Ciencia e Innovación, MAT2009-12023
Duration: Jan 2010 - Dec. 2012
Amount: 142 kEuros
Principal Researcher: Gonzalo Ruiz López

15. Safety and Durability of Construction Structures
Financed by: Ministerio de Ciencia e Innovación, Programa CONSOLIDER, CSD2006-00060
Duration: 2006-2011 (Incorporación del Subgrupo de la Universidad de Castilla-La Mancha en 2011)
Principal Researcher: Carmen Andrade Perdrix (Subgroup UCLM)
16. Diseño y desarrollo experimental de sistemas de tuberías con propiedades Mecánicas mejoradas de poliéster reforzado con fibra de vidrio fabricadas mediante centrifugado
(*Design and development of glass fibre reinforced polyester tubes: mechanical properties improved through centrifugal fabrication*)
Financed by: Ministerio de Ciencia e Innovación, Programa INNPACTO, Expediente IPT-2011-1331-020000
Duration: 2011-2014
Amount: 181.8 kEuros
Principal Researcher: Gonzalo Ruiz López
17. Adaptación del programa CivilFEM-ANSYS a las normas tecnológicas chinas
(*Adapting CivilFEM-ANSYS for Chinese Codes*)
Financed by: Ingeciber S. A.
Amount: 22 kEuros
Duration: May 2002 - May 2003
Principal Researcher: Gonzalo Ruiz López
18. Caracterización de la ductilidad y del comportamiento mecánico a muy baja velocidad de deformación de hormigones de alta resistencia
(*Characterization of ductility and mechanical behaviour of HSC at very low loading rates*)
Financed by: OHL
Amount: 30 kEuros
Duration: April 2005 - Dec. 2005
Principal Researcher: Gonzalo Ruiz López
19. Caracterización de la ductilidad y del comportamiento mecánico en función de la velocidad de deformación de varios hormigones de alta resistencia.
(*Characterization of ductility and mechanical behaviour of several HSCs at various loading rates*)
Financed by: OHL
Amount: 327 kEuros
Duration: Nov. 2006 - Dec. 2010
Principal Researcher: Gonzalo Ruiz López
20. Investigación sobre el pandeo de paneles prefabricados esbeltos. Estudio numérico.
(*Buckling of slender precast panels: a numerical study*)
Financed by: Ortiz - INDAGSA
Amount: 66.4 kEuros
Duration: Jan. 2007 - Dec. 2007
Principal Researcher: Gonzalo Ruiz López
21. Investigación sobre el pandeo de paneles prefabricados esbeltos. Estudio experimental.
(*Buckling of slender precast panels: an experimental study*)
Financed by: Ortiz - INDAGSA
Amount: 75 kEuros
Duration: Sept. 2008 - Aug. 2009
Principal Researcher: Gonzalo Ruiz López
22. Investigación sobre la fatiga de sistemas de vía en placa: modelo numérico y validación
(*Investigation on the fatigue of concrete slabs: numerical study and validation*)

Financed by: OHL
Amount: 397 kEuros
Duration: June 2009- Dec. 2012
Principal Researcher: Gonzalo Ruiz López

23. Investigación sobre la resistencia de anclajes de paneles autoportantes. Modelo numérico y validación.
(*Anchorage strength of panels made from self-compact concrete: numerical model and validation*)
Financed by: Ortiz - INDAGSA
Amount: 70.8 kEuros
Duration: July 2011 - Dec. 2012
Principal Researcher: Gonzalo Ruiz López
24. Cálculo numérico de nudos atornillados del proyecto ANROTECH
(*Numerical study on screwed nodes for ANROTECH*)
Financed by: ANRO S. L.
Amount: 10.6 kEuros
Duration: Sept. 2011-Dec. 2011
Principal Researcher: Gonzalo Ruiz López
25. Diseño y caracterización mecánica de hormigones pretensados reforzados con fibras para la construcción de fustes de turbinas eólicas
(*Design and characterisation of HSC reinforced with fibres for the construction of wind towers*)
Financed by: Pacadar
Amount: 380 kEuros
Duration: April 2011- June 2014
Principal Researcher: Gonzalo Ruiz López
26. Fatiga de Hormigón de altas prestaciones reforzado con fibras
(*Fatigue of high-performance fiber-reinforced concrete*)
Financed by: JCCM (regional) and FEDER (European)
Amount: 168 kEuros
Duration: Sept. 2014-Sept. 2017
Principal Researcher: Chengxiang Yu
27. Daño a fatiga de altas prestaciones reforzado con fibras
(*Fatigue damage of high-performance fiber-reinforced concrete*)
Financed by: National
Amount: 135 kEuros
Duration: Jan. 2015- Dec. 2019
Principal Researcher: Chengxiang Yu
