

Practice 3: children mathematics on the internet

Group:.....

Objectives:

Language:

To manage vocabulary and English expressions for browsing and discovering electronic materials.

In each section, write the vocabulary you have found and used

Mathematics:

General vocabulary:

Expressions:

Nouns	Verbs (actions)	Adjectives

Context: Now, YOU ARE THE TEACHER...

1. Browse on the internet to find web sites or apps that you could use or adapt to your class (3-4, 4-5, 5-6 yr). Choose one level.

2. Design your own activity:

Note: It is crucial for the fitting of **task** and **children** to know the group and their skills. Provided that it is impossible in our case, take into account the sequence followed in Practice 2 for natural numbers, the document called “P3.c.secuenciación” in Materiales clase folder, tema 2, in campus virtual, and the “artículo” you work on, as a hint to see how to use problem solving with children. In your proposal, start from a context and combine logic skills with number skills.
